Proven reliability in complex environments

Managing complexity. Delivering performance.

Sirail designs, produces and integrates complex electrical and electromechanical systems for demanding industries. With strong expertise in engineering, industrialization and field services, we deliver reliable and tailor-made solutions across Europe.

We support your projects at every stage, from design to long-term maintenance.

Engineering & Design

Design and development of electrical and electromechanical systems.

- Electrical architecture & schematics
- 2D / 3D design
- Simulation, validation & testing

Production & Industrialization

From prototype to series production with controlled industrial processes.

- Harnesses & complex cabling
- Electrical cabinets & control systems
- Industrialization & quality control

Installation & On-site Services

Deployment and integration directly on customer sites.

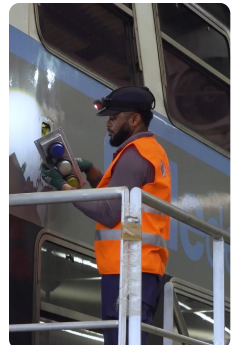

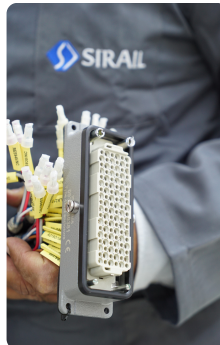

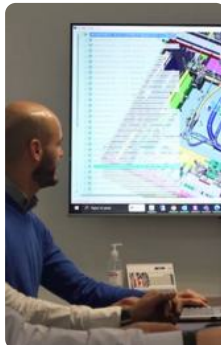

- On-site installation
- Commissioning & testing
- Technical support across Europe

Maintenance, Retrofit & Support

Long-term support to ensure performance and durability.

- Maintenance & repair
- System upgrades & retrofit
- Configuration management

Sirail Service

Our dedicated teams operate directly on customer sites to support installation, renovation and maintenance operations.

- On-site interventions across Europe
- Retrofit & modernization programs
- Tailor-made technical support

Why Sirail ?

Sirail combines engineering expertise, industrial excellence and field experience to deliver complex electrical and electromechanical systems.

With a strong European footprint, we ensure flexibility, proximity and competitiveness across all our operations.

From design and industrialization to installation, maintenance and retrofit, we support our customers across the entire value chain with a constant focus on quality, reliability and traceability.

Trusted by leading industrial players, Sirail delivers robust, tailor-made solutions for the most demanding environments, from power distribution to advanced cabling systems.

Advanced Electrical Solutions, our capabilities include:

Power distribution

Electrical conversion

Test benches

Electrical signaling

Over-Braided harnesses

Electrical bays & shelves

Medium & low voltage racks / cabinets

Fiber-optic or coaxial cables
