*Managing complexity. Delivering performance.*

# For complex electrical assemblies from prototype to series

## Experience

Sirail's manufacturing expertise and railway know-how enable us to support projects from prototype to serial production. Combining skilled teams, industrial excellence and rigorous quality control, we deliver reliable, high-performance solutions tailored to our customers' requirements.

## Proximity

Our industrial footprint gives you a decisive advantage, with operations across Northern and Southern France, Germany, Italy, Morocco and Tunisia. This strategic geographic presence ensures close proximity to key markets, strong cost competitiveness and a secure, reliable supply chain (OTD > 98%).

## Multi-Skilled

Sirail's expertise and experience support the development and production of next-generation rolling stock and signaling systems with flexible, modular solutions tailored to your needs.

Sirail covers the full value chain : from engineering, manufacturing, integration to maintenance, of electrical and signaling systems, including driver desks, cubicles, wiring, HV/MV cabinets, cable ducts and master controllers.

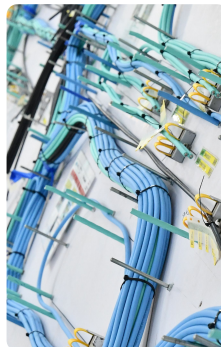

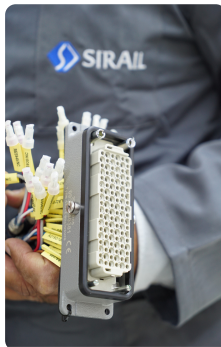

## Compliance

We ensure the highest quality standards through qualified teams and controlled processes, fully compliant with customer requirements and industry regulations (railway, defense, energy).

Our commitment is supported by recognized certifications : ISO 9001, ISO 14001, ISO 22163 (IRIS), EN 15085-2, EN 9100, and EcoVadis assessment.

All sites are certified to ensure consistent quality and reliability.
