

Sirail Services

Electrical & Electromechanical Solutions

Our field **teams deploy across Europe** to keep your systems running, from scheduled maintenance to urgent **on-site interventions**.

Maintenance & Retrofit

ERTMS expertise

Diagnosis & Repair

Dismantling

Upgrading

European footprint

Managing complexity. Delivering performance.

Tomorrow's railway systems, connected and secured

Full-service

Comprehensive execution of maintenance, retrofit and upgrade projects, for the full lifecycle of your project :

on-site assessment and engineering to testing, documentation and final ready-to-install delivery.

Proximity

Our highly mobile technicians deliver a full range of services in specialized and demanding environments, operating fully autonomously and reliably on complex projects across Europe and over.

Multi-Skilled

The Sirail Service team provides integrated multi-trade services encompassing ERTMS-related systems, retrofit, electrical, electromechanical and mechanical works, as well as pipework, painting and interior trim operations.

Acting as a single-source partner, Sirail Services streamlines project coordination, mitigates execution risks and ensures reliable, on-time delivery across demanding industrial environments.

Safety & Compliance

We ensure the highest safety standards through qualified technicians, dedicated pre-intervention safety briefings and strict operational risk management adapted to each site environment.

All interventions comply with customer requirements, site regulations and industry standards :

Systematic verification and documented validation ensuring full regulatory compliance.
